

MWA-Project 06-2020

Ahmad Awad: 611040

Lucas Penz: 611028

Project Installation:

- 1- Go to <https://github.com/lapenz/mwa-project.git>
- 2- Clone the Project.
- 3- Go to [mwa-project/online-shopping-backend/](#) and Run **npm Install** for backend “Node.js” project.
- 4- The config file for DB is “config.js” as below:

```
module.exports = {  
  'jwtKey': 'online-shopping-key',  
  'expiresIn': '5h',  
  'dbUrl': 'mongodb://localhost:27017/',  
  'dbName': 'shoppingdb',  
  'port': 3000  
};
```

- 5- Run **user-seeder.js** to insert list of predefined users using:

```
cd seed
```

```
node user-seeder.js
```

- 6- Run **product-seeder.js** to insert list of predefined users using:

```
cd seed
```

```
node product-seeder.js
```

- 7- Go to [mwa-project/online-shopping-frontend/online-shopping/](#) and Run **npm Install** for frontend “Angular” project.
- 8- The API Url defined in environment file as below

```
export const environment = {  
  production: false,  
  apiUrl: 'http://localhost:3000/',  
};
```

9-
